Announces a New Program: Cisco Networking Academy Courses Pursue CCNA certification

Start
this fall

Beginning this fall the School for Adult Learning will offer a program of four courses designed to prepare students for the Cisco Certified Network Associate (CCNA) exam. The four courses, part of the Cisco Networking Academy Program, teach students to design, build, and maintain computer networks. The Academy curriculum includes basic networking skills such as pulling cable as well as more complex concepts such as applying advanced troubleshooting tools. For more information on the Cisco Academy Program visit the following URL:

<http://www.cisco.com/warp/public/779/edu/academy/>
